Dr. Anthony Fauci has been hailed as an immunity god by many establishment types, even though he has already been caught lying about necessary medical precautions for Covid. And now, the icing on the cake.

> America’s top infectious disease official Dr. Anthony Fauci received a prestigious $1 million Israeli prize Monday, along with six other researchers who shared two additional $1 million prizes for their contributions to health and medicine. The Dan David Prize, affiliated with Tel Aviv University, said it honored Fauci for his career in public health and “speaking truth to power” during the politicized COVID-19 crisis. Fauci “is the consummate model of leadership and impact in public health,” the awards committee said in a statement.

This is akin to Cuomo getting an Emmy for his press conferences in which he killed grandma in the nursing home. Meanwhile, Israel got lots of medical equipment from New York. Keep in mind Fauci also got an award from the Koch brothers. So, I guess this is just another step down.
